

STEALTH™ Xtreme

Ultra-Miniature IRTarget

The Modular Design of the Stealth IRTarget incorporates a simple but revolutionary innovation--by breaking the electronic circuitry and the infrared detector into two separate modules, the visible parts of the IRtarget are miniaturized to the ultimate degree.

Patent Applied For

The Stealth features an adjustable digital filter that allows the installer to "tune" the Stealth unit to the room environment. Now any situation encountered in the field can easily be managed. Adjustments are made via a small set screw located on the Stealth box.

Now professional installers have hundreds of viable ways to conceal a remote relay system. The tiny Stealth IRTarget can be hidden in books, plants, speaker grills, on lamps, inside fixtures and appliances, wherever your imagination can take you!

Easily Expand Any IR System. The Stealth IRTarget works with Audioplex, Niles and Xantech IR systems. Simple, optional connection points enable installations to be made with any IR system.

New! Stealth Speaker Target. Uses the same Stealth sensor but places the electronics in a threaded tube, that can be mounted on any speaker by drilling a 5/8" hole.

Stealth (sensor only)	
STEALTHXTR40	40 KHz sensor
STEALTHXTR56	56 KHz sensor
STEALTHXTR4056	Dual Band sensor
STEALTHXTR SPEAKER TARGET	Dual Band speaker mounted

CAM IRTarget

Outdoor IR Target

Expand your IR system outdoors with our innovative CAMIRTarget! Designed for pin-point receiving of infrared signals, this outdoor Target even works in direct sunlight.

The camera shaped, weather resistant housing features a pivoting base allowing for a wide range of adjustment. The CAMIRD4056 receives both 40K and 56K signals making it ideal for any installation.

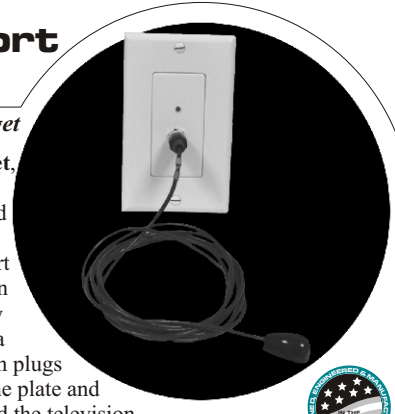

Please specify color Black or White

Target Only	
CAMIRD4056	Dual Band IRTarget

Plasma-Port

Ultra-Miniature IRTarget

Like the Stealth IRTarget, the Plasma-Port separates the electronic circuitry and the infrared detector into two parts. The Plasma-Port electronics are mounted on a wall plate that can easily be hidden behind a plasma television. The Target then plugs directly into the jack on the plate and can be placed on or around the television.

Target Only	
Plasma-Port	Dual Band IRTarget

InWall IRTarget

Single Gang Wall Mounted IR Target

SYS-TAT NOW STANDARD!

Includes Talkback and System Status LED's

Easily Expand Any IR System. The In-wall IRTarget - Works with Audioplex, and most Niles and Xantech IR systems. Simple, optional connection points enable installations to be made with any IR system.

Optional-Combine X40 and X56 in one single gang plate
Specify "S" for Standard Style Plate, "D" for Decora
Specify color of wall plate

Target Only	
X40	40 KHz sensor
X56	56 KHz sensor
X4056	Dual Band sensor

Plasma Proof Your System!

Using narrowband technology and a proprietary manufacturing technique, most Audioplex IRTargets can be Plasma Proofed. They install just like any other IRtarget, but can be placed within inches of any plasma screen television and offer 100% reliable control of any IR system. To order, simply add -PP after the IRtarget model number you choose. Note: IR-MA IRTarget is Plasma-Proof and requires no special designation.

Plasma-Proof (add to IRTarget Model Number)	
-PP	Makes IRTarget Plasma-Proof
