

CEILING IRTarget

*Flush Mounted in Ceiling For
Omni-Directional Coverage*

Requires 1" diameter hole

Operational Ease as the ceiling is the natural target for many customers. They feel the most comfortable looking at the remote and holding it angled up. Now includes talkback LED for easier system use. For successful macros in home theaters and comfortable operation in bedrooms, the ceiling IRTarget is the natural choice.

The Only Ceiling IRTarget Immune From Interference regardless of source. By their very nature, narrow band sensors cannot "see" information (static) outside of their programmed bandwidth. Only modulated IR commands are accepted and relayed to the system--regardless of external sunlight, electromagnetic fields or RF transmissions.

Specify color of sensor: (W) for White / (B) for Black

Target Only	
CMX40	40 KHz IRTarget
CMX56	56 KHz IRTarget
CMX4056	Dual Band IRTarget

ShelfTop IRTarget

SYS-TAT NOW STANDARD!

Discrete Black Shelftop Chassis

Talkback and System Status LED's end Customer Confusion. Operation of concealed equipment can be confusing to your customers. Since you cannot see the components, you may not know if they are on or off.

With Audiplex's Revolutionary Miniature Displays, the tiny Shelftop IRTarget ends operational snafus. A single, ultra-bright two-color LED lets you know the system's status. The LED flashes RED if the batteries are good in the remote control. The LED lights GREEN when the system is on. If your system is off, the LED is off. With the ShelfTop IRTarget, confusion is gone!

4.25"W x 1.25"H x 2.75"D

Target Only	
STOP-X40	40 KHz IRTarget
STOP-X56	56 KHz IRTarget
STOP-X4056	Dual Band IRTarget

IRTarget Options

Complete Installation Packages For Easy Ordering and Savings

Hard Wire Package

Along with the IRTarget selected, this package contains (1) power supply, (1) IRBug-HW, (1) IR-TB and (3) IRprisms. This package can be used as a simple stand alone IR system or as an interface package to add to an existing IR installation of any manufacturer. To order, simply add -HW-PKG after the IRTarget model number you choose.

Hard wire Package (add to IRTarget Model Number)	
-HW-PKG	Complete Package for Hard Wired Systems

One Room Package

For a professional installation with the built-in expandability and installation aids, order the one room package. Along with the IRTarget selected, this package includes (1) IRStation-C, (1) Power Supply, (6) IRBug-PL and (6) IRprisms. Simply add -1RM-PKG after the IRTarget model number you choose.

Hard wire Package (add to IRTarget Model Number)	
-1RM-PKG	Complete One Room Package

MicroMount IRTarget

**NOW AVAILABLE
IN DUAL BAND!**

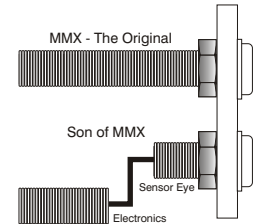

*Flush Mounted
in 5/8" Hole*

Stealth With Talk Back & Status. The MicroMount IRTarget, utilizing StealthIR technology, is one of the smallest IRTargets residing completely in a thin, tubular enclosure. Both Talkback and Status LED's are built-in for confusion free operation.

Son of MMX

Need something smaller? Son of MMX utilizes Stealth IR technology to separate the electronics from the sensor allowing installation in the tightest of spaces. Perfect for picture frame mounting and cabinets with limited clearance.

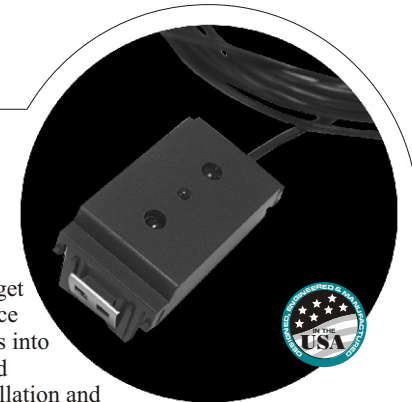

White face plate is standard
Add B to model number for Brass face plate
Add C to model number for Clear face plate

Target Only	
MMX40	40 KHz IRTarget
MMX56	56 KHz IRTarget
MMX4056	Dual Band IRTarget
Son of MMX	Dual Band IRTarget

IR-MA IRTarget

*Weather Resistant,
Plasma Proof IRTarget.
Perfect for Marine
Applications*

Ultra-Modular Mini IRTarget with Plasma TV interference proofing that literally snaps into an existing Vimar bulkhead connector plate. Easy installation and flawless IR performance allows the professional installer and marine enthusiast to upgrade their nautical entertainment system with plasma TV technology.

Target Only	
IR-MA	40 / 56 KHz IRTarget
