

# Three Ways To Order The Best Wall Plates On The Market

## Standard Wall Plates

Standard Wall Plates enable your business to stock the most common configurations of connectors packaged in retail hanging poly bags. Ask your manufacturer representative for details or call us directly.

Standard Wall Plates are available in Standard or Decora, and in all Leviton colors.

## Custom Wall Plates

Everyone in the Custom Install Business has systems that are...well, different. Maybe it's space limitations or perhaps there's truly an unusual mix of components. In any case, Audioplex's custom wall plate system enables you to easily and quickly order a custom made plate. You design it, we'll build it! We enjoy the challenge!

## Connector Caddy™

End expensive call backs to change plate color or install a last minute plate. Connector Caddy enables you to keep plates and connectors in a handy toolbox caddy letting you build plates on the fly at the job site.

## Customize Your Plates

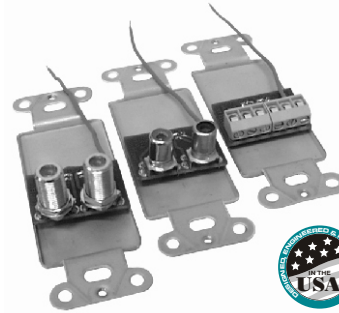

### Easy-Connect

For those who wish to avoid soldering in the field, EZ Screwdown Connectors are a welcome option. EZ's are available on most RCA, small and large Binding Posts and Banana Jack Plates.

### S-Video Quick-Connect

The S-Video Quick Connector (QC) eliminates the need for any solder connections to the tiny pins typically seen on the back of S-Video wall plates. The S-Video QC option separates the luminance and chroma information of an S-Video signal for easy transition to lengthy video rated cables with COAX or RCA connectors. And, with the screw down termination strip option, the S-Video QC feature can even be used with connector-less cables.

Please specify QC Options:  
Screwdown "SD", "RCA" or Coax "F"

1SV+QC	1 S-Video with Quick-Connect
2SV+QC	2 S-Video with Quick-Connect
QC Option	For custom plates

Please call for pricing information on custom plates and for adding Easy-Connect to your plates.

## Ordering Your Plates

### Choosing Decora® or Standard Style Plates

Decora style plates enable the installer to match in-wall gear with Decora plates already existing in a home. Decora plates also allows grouping of products in multi-gang configurations. Order Decora style plates by placing a "D" after the model number.

Standard style plates also enable the installer to match existing wall plates in the home and to group multiple products in the most space saving manner. Order Standard style plates by placing a "S" after the model number.

### Selecting Plate Color

Order plates with the correct color by placing the appropriate letter after the model number and plate style.

<b>Decora Colors</b>	White	(W)
	Ivory	(I)
	Almond	(A)
	Black	(B)
	Brown	(BR)
	Gray	(GR)

<b>Standard Colors</b>	White	(W)
	Ivory	(I)
	Almond	(A)
	Black	(B)
	Brown	(BR)
	Gray	(GR)
	Stainless Steel*	(SS)
Brushed Brass*	(BB)	
Polished Brass*	(PB)	

\* Available at an additional cost

### Choosing Metal or Plastic Plates

Metal plates provide strong, rigid support for in-wall devices. They are painted with our super durable coating of Leviton® based color choices that provide a perfect match to any adjacent wall plates. Order plates in metal by adding the letter "M" after the color choice.

Plastic plates have one key advantage over metal. Since the plate is molded from plastic consisting of one color all the way through, a scratch will not reveal any base material. Because of the popularity of plastic plates, Audioplex's default material whenever possible is plastic. You do not need to add a letter when ordering.
