

System Mods - Enhance and Modify Your System Design!

Audioplex System Mods enable you to modify existing systems, extend capabilities and add automatic features at a modest cost. We've built hundreds of custom modifications for installers--designed to serve a special purpose just for their system.

Often changes in requirements or design arise after the pre-wire is done. Audioplex makes unforeseen changes feasible. Here in System Mods, you'll be inspired with new ideas and lots of new possibilities for oversights, add-ons and ever changing user needs.

MULTI-MATCHIT 300S

New Product!

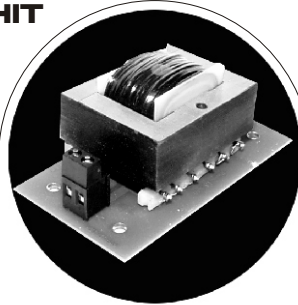

Multiple Output Connectors for Easy Installations

Get automatic impedance matching for up to four rooms! This stereo MatchIt combines two of the same trifilar wound transformers as the MatchIt 300S along with one stereo input and four stereo outputs. Simply mount the unit near the system amplifier, make amplifier and speaker connections and enjoy 300 watts of trouble free amplifier protection.

- One Stereo Input
- Four Stereo Outputs
- 300 watts
- Screw-down connectors

Multi-MatchIt 300S	300 watt version
--------------------	------------------

MATCHIT

"Add-in Anywhere" Autoformer Protection

Trifilar wound autoformers provide quick, ready-to-install amp protection at a very low cost.

- One Channel - Need two for stereo
- 200 watt, 300 watt and 600 watt versions
- Selectable Impedance Matching: (solder taps) 2X, 4X, 8X or 16X
- Install anywhere in amplifier to speaker path
- Screw-down connectors

Matchit 200	200 watt version
Matchit 300	300 watt version
Matchit 600	600 watt version

STEREO MATCHIT

"Add-in Anywhere" Autoformer Protection

The Stereo Matchit incorporates two of the same trifilar wound transformers as the Matchit 200 and 300, but provides rocker-switch selectable impedance and quick installing spring clip termination.

- Specify range of impedance matching
- 4X enables 2X or 4X
- 8X enables 4X or 8X
- 16X provides 8X and 16X

5.75"W x 2.75"H x 5.5"D

StereoMatchit 200	200 watt version
StereoMatchit 300	300 watt version

LLSC-1

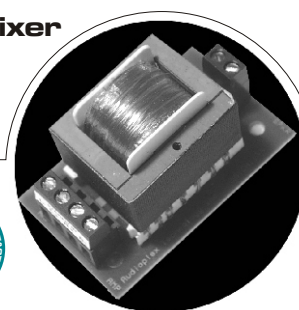

Line Level Stereo to Mono Converter

- Converts any Stereo Amplifier to Two Mono Channels
- Fully Buffered True Mono Conversion
- Connects to Tape or Processor Loop
- Left and Right Jack Inputs to Dual Mono RCA

LLSC-1	Stereo to mono converter
--------	--------------------------

MonoMixer

Stereo to Mono Converter

- Converts any stereo signal (left and right channel) to a mono signal
- Summing Autoformer mixes channels at speaker level
- Place anywhere between the amplifier outputs and the speaker you wish to operate mono
- Screw-down connectors for tight, secure connections accept up to 14 gauge wire

Not for use with bridged amps

MonoMixer 200	200 watt version
MonoMixer 300	300 watt version
MonoMixer 750	750 watt version

LEVELIZER™

Eliminates Annoying Volume Changes

- No Insertion Loss - Flat Frequency Response
- Automatic Calibration - Nothing to set up or adjust
- Connects to Tape or Processor Loop RCA to RCA
- Includes 16V AC Power Supply

5.25"W x 2"H x 4.75"D
