

**IMPcalc™**

**IMPEDANCE CALCULATING SOFTWARE**

Save hours of calculations by long hand or with a calculator. No more guessing of speaker network impedances. Within 30 seconds of entering your system information, you will have the impedance of your system displayed and what the impedance multiplier needs to be for your amplifier.

IMPcalc™ runs under Microsoft DOS® or in a DOS window of Microsoft Windows 3.1®, Windows 95® and Windows 98®. Type IMP1 to start. Then simply enter the number of 4, 6 and 8 Ohm speakers you have and instantly see what the impedance multiplier needs to be for amplifiers with 2, 4, 6 and 8 Ohm outputs. File size is only 34K.
