

INSTALLATION MANUAL

702L

70 Volt to Line Level Audio Converter

The 702L converts a 70 volt constant voltage signal to line level. It is used to allow an amplifier with 70 volt output to drive second amplifier with a line level input. The output is transformer isolated from the 70 volt system. The device uses one watt of power from the 70 volt line.

Use two units for stereo.

INPUT CONNECTIONS

Connect your 70 volt system output to the binding post terminals on the 702L. It can be connected in parallel with other 70 volt devices. It presents a 1 watt load to the 70 volt system.

Front

OUTPUT CONNECTIONS

Connect the input of the driven amplifier or other device to the RCA jack output of the 702L. If the amplifier has stereo inputs, a Y connector cable such as the Audioplex Y-2M may be used.

Rear

WARRANTY

Your Audioplex Technology 702L is covered by a LIFETIME warranty against all defects in workmanship and materials for the original end user. Any defects will be remedied without charge for labor or parts.

Damage incurred during shipping or accident is not considered to be a defect, and not covered by this warranty. If such incident occurs, you must contact the courier immediately. Audioplex Technology is not responsible for defective operation caused by misuse or by modification or service by any unauthorized person or agency.

The product must be properly installed and operated according to instructions for the warranty to apply. Any necessary servicing must be done by Audioplex technology. The products must be returned expenses prepaid (no call tags will be issued/customer is responsible for shipping of return), with written authorization from the company. The product must be shipped with proof of purchase and in the original carton and packing material to avoid damage.

This warranty gives you specific rights. You may have other rights which vary from state to state.
